TOBACCO 21

Tobacco 21 raised the age to purchase tobacco nationwide to 21.

This means no tobacco products including vapor products should be sold to young people under the age of 21.

Effective Tobacco 21 policy requires more than just raising the age.

This includes tobacco retail licensing, adequate prevention resources, and fully funding cessation programs.

NC can implement Tobacco 21 successfully with the right policy supports.

North Carolina needs to take action to implement Tobacco 21 and prevent young people from using tobacco products.

Federal Tobacco 21 legislation was passed in 2019. It's our turn to act.
